Energy audit at Williston library

Courtesy photos

Members of the Williston Green Initiatives Committee, in partnership with the Dorothy Alling Memorial Library and Williston-based Building Energy Inc., conducted an energy audit at the library Sunday. During the open house portion of the audit, the public toured the building, checked for insulation gaps and heat loss with infrared cameras, saw the building get pressurized with door blowers, and learned all about the energy audit process. Williston Green Initiatives will conduct an energy fair from 10 a.m. to 2 p.m. Oct. 24 at the Williston Town Hall.
